EDUCATION

- B. Engineering**

NMAM INSTITUTE
OF TECHNOLOGY
2016-2020

WORK EXPIRENCE

- Cloud Engineer** Jun 2023- present
Niveus

Here I worked as a frontend developer, where I worked on several projects , In one project I worked on E-Sign where I created a custom template engine just like a CKeditor5 here user can input text images and also added his signature once the template is created the User can use this in E-sign Journey and signature positions are replaced with actual signatures. Also worked on revamping the whole website by adding Apex charts and Framer motion animations.

Tech used : React js Redux JS Typescript

- Web developer** May 2021- May 2022
Lycan 3d

Developed web application using MERN stack technology, and tested web application's using Node Js & JavaScript and deployed them to Heroku and Netlify.

Tech used : React js Node js AWS/S3

- Full Stack developer** Jun 2022- May 2023
Suventure

Here we were providing services to BQ prime news web site, which used quint Type CMS .Here I worked on frontend to fix bugs as well and creating custom page. And I also worked on creating web stories using AMP.

Tech used : React js Node js AMP
